

SPG Mission Statement

The Shropshire Patient Group is a group of patients with individual views and opinions drawn from the Patient Participation Groups of GP practices within Shropshire.

Our aim is to support, by providing a patient and lay perspective, the work done by NHS Shropshire. We believe that by having different perceptions, concerns and priorities to NHS Shropshire, we can have a positive input to their work and on the present and future medical care in our community.

The SPG also acts as a forum for PPGs to discuss matters of common concern and exchange ideas. In addition, by inviting speakers to address the SPG, it can be a channel by which information can be widely disseminated around the county.
